PROFESSIONAL EXPERIENCE

Self-employed

Feb 2025 - Present

Microsoft Dynamics 365 F&O Senior Developer

- Develop and customize Microsoft Dynamics 365 Finance & Operations, primarily using X++ and C#.
- Design and implement integrations between D365 F&O and external systems using Azure Functions, REST APIs, XML/JSON and SFTP.
- Work closely with business stakeholders to analyze requirements, design solutions and translate business processes into technical implementations.
- Organize and prioritize development work in Azure DevOps, managing Epics, Features, Requirements, Bugs, queries and team areas.
- Support and improve business processes across Sales, Procurement and related ERP workflows.
- Coordinate technical implementation from initial request through delivery, clarifying requirements with stakeholders and reviewing solutions.
